

PDC Reconstruction Literature Survey and SAMURAI Terminal Air-MS Gap Analysis

Baiting Tian
RIKEN Nishina Center / DPOL Experiment

2026-04-26

Contents

1	TL;DR	4
2	The problem: air multiple scattering at the SAMURAI terminal	4
2.1	Geometry of the proton flight path	4
2.2	Measured σ values	4
2.3	Gap to design specifications	4
2.4	Why this matters for the science floor	4
3	PDC reconstruction reference frame	4
3.1	Hardware foundations	4
3.2	Algorithm spine	4
3.3	Performance achieved across SAMURAI campaigns	4
4	Gap analysis	4
4.1	Performance: σ values	4
4.2	Methodology	4
4.3	Material budget and vacuum configuration	4
4.4	Experimental configuration and geometry	4
5	Broader MINOS+SEASTAR chain context	4
5.1	SEASTAR programme timeline	4
5.2	Companion detectors	4
5.3	Reviews and resources	4
5.4	Caveats from the broader bibliography	4
6	Implications and next steps	4
6.1	Short-term data acquisition action items	4
6.2	Medium-term simulation and analysis directions	4
6.3	Open questions	4
6.4	Non-goals	4
7	References	4
7.1	Hardware and methodology (peer-reviewed, foundational)	4
7.2	Algorithm references	4
7.3	PhD theses with PDC methodology	4
7.4	Physics papers using PDC1/PDC2 (confirmed/implicit)	4
7.5	Excluded / context-only	4
7.6	Reviews and topical collections	4

7.7	Construction proposals and internal notes	4
7.8	Project-internal references	4

- 1 TL;DR
- 2 The problem: air multiple scattering at the SAMURAI terminal
 - 2.1 Geometry of the proton flight path
 - 2.2 Measured σ values
 - 2.3 Gap to design specifications
 - 2.4 Why this matters for the science floor
- 3 PDC reconstruction reference frame
 - 3.1 Hardware foundations
 - 3.2 Algorithm spine
 - 3.3 Performance achieved across SAMURAI campaigns
- 4 Gap analysis
 - 4.1 Performance: σ values
 - 4.2 Methodology
 - 4.3 Material budget and vacuum configuration
 - 4.4 Experimental configuration and geometry
- 5 Broader MINOS+SEASTAR chain context
 - 5.1 SEASTAR programme timeline
 - 5.2 Companion detectors
 - 5.3 Reviews and resources
 - 5.4 Caveats from the broader bibliography
- 6 Implications and next steps
 - 6.1 Short-term data acquisition action items
 - 6.2 Medium-term simulation and analysis directions
 - 6.3 Open questions
 - 6.4 Non-goals
- 7 References
 - 7.1 Hardware and methodology (peer-reviewed, foundational)
 - 7.2 Algorithm references
 - 7.3 PhD theses with PDC methodology
 - 7.4 Physics papers using PDC1/PDC2 (confirmed/implicit)
 - 7.5 Excluded / context-only
 - 7.6 Reviews and topical collections
 - 7.7 Construction proposals and internal notes
 - 7.8 Project-internal references
